The regular season is over and here are the final Rankings.

Remember this is all math and has nothing to do with personal feelings. OK, maybe a couple of personal feelings. But not the warm fuzzy kind.

The fairly simple formula, that has been tweaked from last year:

$$\text{Base Value} + \text{Sched Strength} = \text{Adjusted Value}$$

Base Value = (Win Pct * 100) + (Net Pts * (Week # *.25)). So for this quarter you get 1/4 of the Net Points.

Sched Strength = The average Base Value of teams played divided by 2.
